VACCINE CARGO

After a year of uncertainty, millions of doses of the Pfizer/BioNTech, Oxford/ AstraZeneca and Moderna Covid-19 vaccines have now been approved and manufactured, and with recent analysis indicating 95% efficacy, ready to be deployed, distributed and administered.

Tysers Insurance Brokers Ltd. have partnered with London Market Cargo Insurers to support the cold chain supply system in developing a Physical Damage insurance policy addressing the specific and critical risk issues for vaccines in transit or storage including:

- Decay;
- Deterioration;
- Spoilage;
- Fire, collision, overturning and theft whilst in transit;
- Power failure, breakdown of refrigeration and theft whilst in store.

Tysers Insurance Brokers Ltd. are at the forefront in establishing a "Stock-throughput" programme, with large limits available upon request and policy wording designed specifically to protect valuable vaccines ensuring the safety, respect and security of the global population.
