

# PROFESSIONAL LIABILITY

Our Professional Liability team offers a wide range of tailored coverage solutions for US and Canadian (Engineering) professional service firms. Our insureds face a variety of challenges that threaten to halt or undermine their success.

Using our extensive market knowledge, established long-term relationships and claims expertise, we offer quality advice and competitive solutions to a sophisticated and diverse client base.

Our experience working with the best insurers within Lloyd's, European and Bermudan markets enables us to design coverage solutions that provide peace of mind to expand operations with confidence.

We work with both individual firms buying independent policy programs and facilities seeking niche classes and coverage.
